The **Canadian Journal of Microbiology** publishes papers, in English or French, on all kinds of microorganisms (bacteria, algae, yeast, fungi, and viruses) and on all aspects of microbiology. The Journal warmly receives scientifically exciting papers.

Volume 25, 1979, contained a total of 230 papers and 1520 printed pages, including subject and author indexes; 42% of the contributions were from Canada, 36% were from the U.S.A., and 22% were from other countries. Production is by photo-offset, in two-column format; pages are 190 × 254 cm. A special feature is the fine-quality printing of halftone illustrations.
